## Introduction

Greeting from Construe IT Solutions (CITS) Pvt. Ltd. (India) Team

We would like to introduce to our web-development system: We are developing an API based system which can manage website and customer portal from a back-end system (currently any open source based CRM).

We have developed our own website and have few customers on same.

## Features

1. Manage Live Stream: Audio and Video (e.g. SCube).
2. Multi Language Support (e.g. Harimilap).
3. A very SEO friendly System (e.g. CITS).
4. User Friendly URL.
5. User Profile and membership management (e.g. Harimilap) Almost all features a CRM has can be replicated to Customer portal.
6. Single Administration for Multiple websites (e.g. SCube).
7. All content can be managed from back-end (Images, Text, Videos, PDF, and Documents etc.).
8. Also including some part of CSS and JavaScript also could be managed from backend.

## Other Administrative features

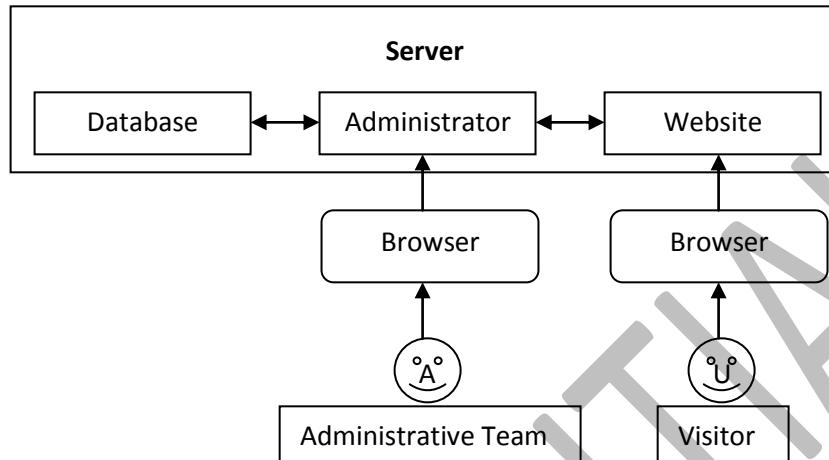

1. Editors: by which the administrator no need to have technical skills to manage a website content.
2. Version Controlling
3. Role based access

We help your business grow exponentially...

## Possible Implementations

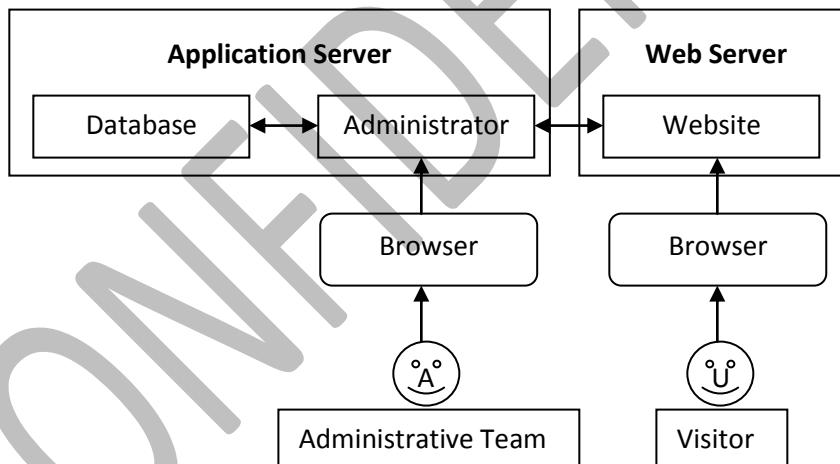

Since the system is API based the implementation of the same is quite flexible and easy to manage.

### Single website single server

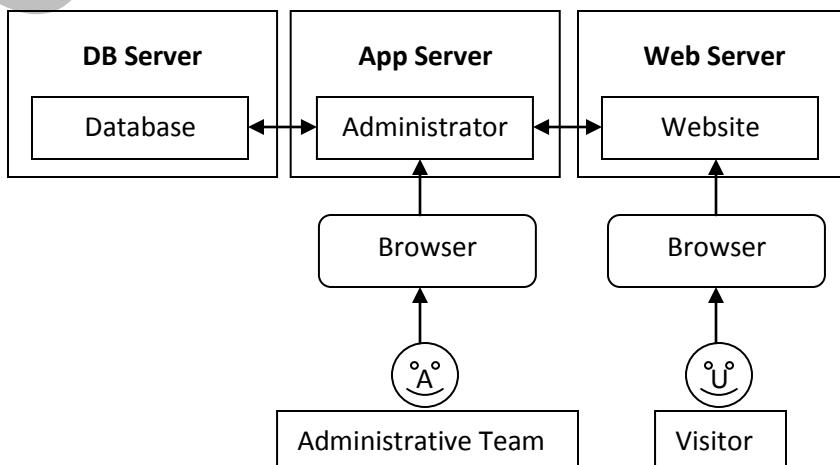

### Single website multiple server

### Two Servers implementation

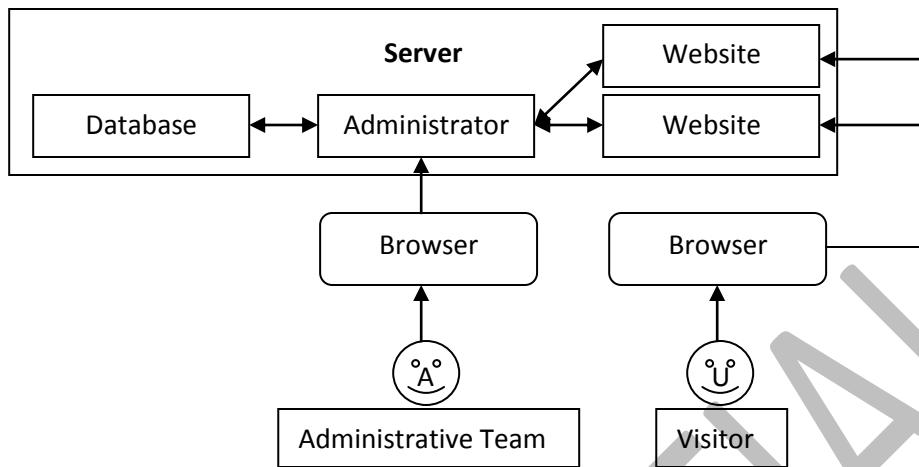

### Three Servers Implementation

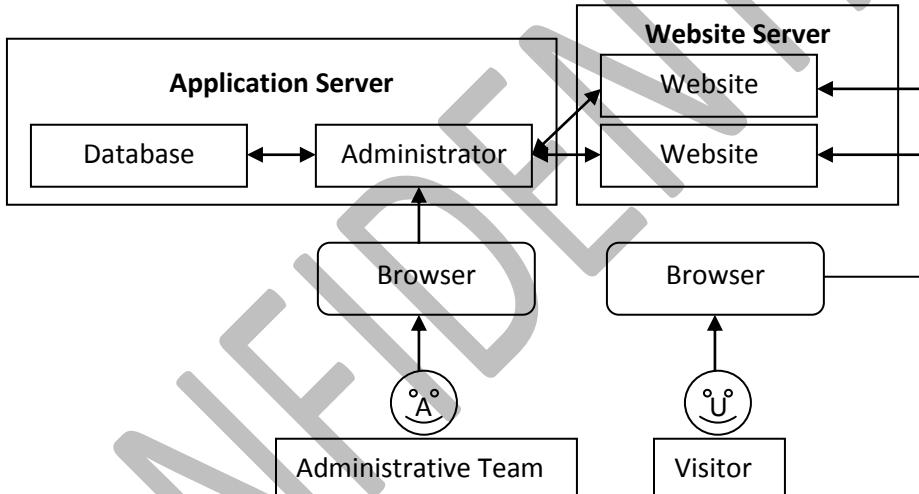

We help your business grow exponentially...

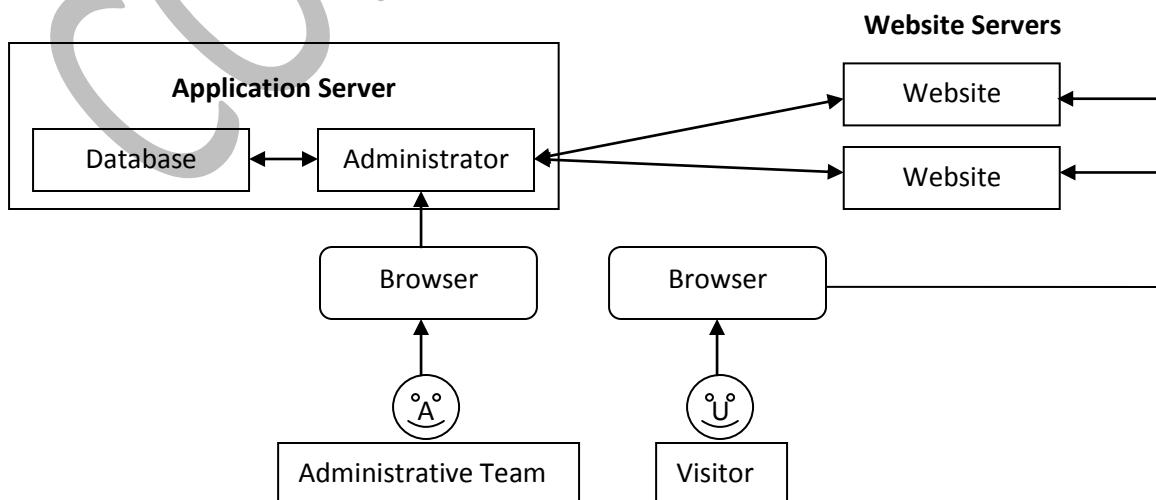

### Multiple website single server (sub-folder or sub-domain)

### Multiple website multiple servers (sub-folder or sub-domain)

### Multiple website server Servers Implementation

We help your business grow exponentially...

## Screen-Shots of current implementations

### CITS: Backend Administration using a CRM

Contrue IT Solutions Pvt. Ltd. Backend

The screenshot shows the CITS Backend Administration interface. At the top, there's a navigation bar with tabs: Marketing, Sales, Support, Activities, Collaboration, Website, and All. Below the navigation bar, there's a sub-navigation bar with links: Web Portals, Meta Data, Website Menus, Menu Items, Web Pages, Page Sections, Social Networking, etc. A toolbar below the sub-navigation bar includes actions like Create Web Portals, View Web Portals, and Import.

The main content area displays the configuration for the website "Contrue IT Solutions Pvt. Ltd.". It includes fields for Name (Contrue IT Solutions Pvt. Ltd.), Logo (23cb48b7-5803-3a9a-5c89-5b29e972d0d), Site Name (We help business grow exponentially...), Default Page URL (index.html), Title Separator (|), Show Copyright (checkbox checked), Assigned to (Administrator), Favicon (af0c0504-dc90-e754-a9c8-5b29e972d0d), URL (<http://www.contrueitspl.com/>), Default Language (English), List Limit (5), Copy Rights (Terms and Condition | Privacy Policy | Disclaimer), Copyright (© 2013 - 2018 Contrue IT Solutions | Powered by CITS - Framework | This template is made with by Colofull | Backend Powered By SugarCRM - CE), and an HTML Description section containing a welcome message and company details.
